

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

REPORT

OF THE

COMMISSIONER OF INLAND REVENUE.

To the Honorable
The Minister of Inland Revenue.

SIR,—Herewith I have the honor to submit statements of the Inland Revenues collected by this Department during the fiscal year ended 30th June 1883, with the usual information as to the cost of collecting them, and statistics respecting the sources whence those revenues are derived.

1. The following summary comparison shows the accrued revenues for the years ended 30th June 1879, 1880, 1881, 1882 and 1883 respectively:—

	1879.	1880.	1881.	1882.	1883.
	\$	\$	\$	\$	\$
Excise	5,408,192	4,312,153	5,400,904	5,936,142	6,282,796
Public Works.....	450,855	440,814	481,066	438,060	510,969
Culling Timber.....	26,858	23,014	38,397	46,781	49,560
Bill Stamps.....	185,333	176,115	193,023	158,493	45
Weights and Measures, Gas and Law Stamps....	16,445	20,812	38,043	30,746	34,889
Total	6,087,683	4,972,908	6,151,433	6,610,222	6,878,259

2. It will be seen by the above Statement that the revenue accrued during the year just closed was \$6,878,259 as against \$6,610,222 accrued in the year 1881-82, being an increase of \$268,037, or about 4 per cent.

The increase has been as follows:—

Upon Excise.....	\$346,654
“ Public Works.....	72,909
“ Culling Timber	2,779
“ Weights and Measures, Gas and Law Stamps.....	4,143
	———— \$126,485
Deduct Bill Stamps.....	158,448
	————
	\$268,037

As compared with the average revenue accrued for the four preceding years, the increase is a little more than 15 per cent.

It will be seen at a glance, however, that this increase would have been larger but for the repeal of the Act respecting promissory notes, by which an important revenue, averaging during the preceeding four years \$178,000, has been cut off.

Summary
statement as
to Excise.

3. The following Statement exhibits the details of Excise Revenue accrued during the past year as compared respectively with the four years ended 1879, 1880, 1881 and 1882.

* In addition to quantities shown in column 5, in the year 1880-81, 52,440 gallons, and in the year 1882-83 157,223 gallons of imported spirits were used in bonded factories.

5. The spirits manufactured during the fiscal year amounted to 4,281,208 proof gallons as against the production during the preceding year of 4,028,847 proof gallons, and an average annual production for the four preceding years of 3,434,527 proof gallons.

Spirits manu-
factured.

6. In the production of these spirits 76,796,094 lbs. of grain were used, of which 57,196,383 lbs. consisted of Indian corn, 14,147,764 lbs. consisted of rye, and 3,754,966 lbs. consisted of malt.

Material used
in the produc-
tion of spirits.

7. The quantity of spirits taken for consumption was 3,848,789 proof gallons, being 672,793 proof gallons in excess of the average quantity taken for consumption during the preceding four years.

Taken for
consumption.

8. The quantity of spirits in bond at the end of the fiscal year, namely 1,841,123 gallons, exceeded the quantity in bond at the commencement of the year by 198,546 gallons.

Spirits in
bond.

Spirits exported.

9. The export of spirits, though in excess of each of the three preceding years, is largely under that of 1877-78 and 1878-79.

Spirits used in bonded factories.

10. The quantity of Canadian spirits used in bonded factories for the production of Methylated spirits and vinegar remains much the same as heretofore, the increased quantity as compared with the preceding four years being less than 8,000 gallons.

Consumption of excisable goods per capita.

11. Appendices A. and B. show the consumption of spirits, tobaccos, and other goods subject to excise, and of similar goods imported subject to Customs duty, per head of the population of the whole Dominion, and also in respect of each Province separately.

Not all consumed in Provinces where duties are paid.

12. In relation to these Statements it may be remarked that a large proportion of the goods entered for consumption at the chief importing centres are not necessarily consumed within the Provinces in which those duties are paid. Without considering this fact, the appendices above referred to as bearing upon the consumption within each Province respectively, would be liable to mislead.

MALT AND MALT LIQUOR.

Comparison of five years as to malt.

13. The following Statement shows the transactions in malt during the year 1882-83, and the four years preceding :—

Fiscal Year.	1. In Warehouse at commencement of period.	2. Manufactured during the year.	3. Taken for Consumption.	4. Exported.	5. Otherwise accounted for.	6. In Warehouse at end of period.	7. Memo of Revenue accrued, including License Fees.

Taken for
consumption.

15. The increased consumption, as compared with the average of the four preceding years, is slightly under 8,250,000 lbs., equivalent to 242,233 bushels, while the increased export is equivalent to about 512,000 bushels. Increase in
consumption
and export.

16. The duties accruing upon malt and malt liquor entered for consumption, including brewers and maltsters license fees, amounted to \$411,173, an amount approximating to the average revenues derived from malt during the three years 1877, 1878 and 1879, when the duty was 2 cents per pound, or double that at present levied. Duty accrued
on malt and
malt liquor.

17. Of the malt entered for consumption, viz. 39,587,285 lbs., 36,140,545 lbs. were used in the production of 1,275,744 gallons of malt liquor, and 3,754,966 were used for distilling purposes. Malt used for
malt liquor
and distilling.

TOBACCO.

18. The transactions in manufactured tobacco of all descriptions, for the fiscal year ended 30th June, 1883, and the four years preceding, are shown in the following statement:— Comparison
of five years.

Tobacco
manufactured.

19. The production of manufactured tobacco during the past fiscal year was 9,558,952 lbs., as against 10,03,373 lbs. for the year 1881-82, and 8,641,183 lbs. as the average production of the four preceding years.

Reason of
decrease in
quantity
manufactured.

20. Although the quantity manufactured was somewhat less than that of 1881-82, that taken for consumption was in excess of the quantity so taken during the preceding year. It is probable that the uncertainty which existed in respect of anticipated changes in the Tariff somewhat checked production during the months of February and March, and that the diminution as compared with the year 1881-82 is thus accounted for.

Tobacco for
consumption.

21. The quantity taken for consumption during the past year amounted to 9,896,478 lbs., against 9,113,815 lbs. during the year immediately preceding it and the average of 8,264,321 lbs., of the four years ended 30th June, 1882.

Reduction of
stocks in
warehouse.

22. The determination of the question in respect of the Tariff during the month of April imparted fresh vigor to the trade, and the large quantities entered for consumption during May and June materially reduced the stocks in warehouse at the end of the fiscal year, as compared with those which were held at its beginning.

23. The export of tobacco amounted to 454,922 lbs, as against an Exported. average export of the four years preceding of 349,859 lbs.

24. The following statement will give the quantity of Canada Twist Tobacco which paid duty during the past fiscal year. Owing to the abolition of the supervision of the cultivation of tobacco and the imperfect means possessed by the Department for collecting the revenue over so large an area of country, and a revenue, moreover, so trivial in amount as not to justify any considerable expense in its collection, a decided falling off is noticeable.

It will be observed from the above statement that the quantities which paid duty during the year were not much more than one-third of the quantities paying duty during the preceding year, the entire Revenue collected having been \$6,481.73, against \$18,195 collected during the year ended 30th June, 1882.

INSPECTION OF PETROLEUM.

Canadian
petroleum
inspected.

27. The number of packages of Canadian petroleum inspected during the past fiscal year, was 172,885, and the fees collected thereon amounted to \$16,699.49.

Imported
petroleum
inspected.

28. The number of packages of imported petroleum inspected by the officers of this Department, was 28,780, and the fees collected thereon amounted to \$8,516.60.

Complaints of
Refiners as to
imported oil.

29. During the past year numerous complaints have been made by Canadian Refiners that, while they have been compelled by the Department to comply strictly with the law in reference both to fire-test and gravity, foreign oil has been allowed to enter the Dominion and to compete with their productions in their own market, comparatively free from such restrictions.

Reason of
such com-
plaints.

30. It is believed that there has been some reason for their complaint. The testing instruments are expensive and can scarcely be placed in the hands of officers at every port open for the importation of foreign goods, and the knowledge of the fact that some of the minor ports are not supplied with the necessary instruments has led designing men to go out of the ordinary course of traffic in order to bring in inferior goods at points where the inspection is known to be nominal.

Benefits of
inspection.

31. The benefits arising from a thorough inspection have been clearly proved by the decrease in the number of accidents arising from the use of petroleum, and if these beneficial results are to continue, it is clear that some provision must be made against the importation of

inferior grades which can be produced and sold at rates which the Canadian refiner finds it impossible to compete, so long at least as he is compelled to comply with the provisions of the Petroleum Act.

32. It is thought that the simplest way to meet the requirements of the case would be to restrict the number of ports through which petroleum may be imported. If this were done a thorough system of inspection might be carried out without involving an undue cost for the necessary instruments.

Remedy for
Refiners' com-
plaints.

MANUFACTURES IN BOND.

33. The revenue derived from goods manufactured in bond during the past five years has been respectively as follows:—

Comparison

34. These duties have accrued on vinegar and methylated spirits, the quantity produced being 500,845 standard gallons of vinegar, containing 6 per cent. of acetic acid, and 102,769 gallons of methylated spirits; in addition to which 115,130 gallons of spirit varnish were produced and subsequently exported.

40. The usual Statement as to the quantity of grain transhipped at Port Colborne, will be given with the Report of Canal Statistics for the season of navigation, which will be printed in the Supplementary Report.

Grain transhipped at Port Colborne.

Slides and Booms.

41. The increase of revenue derived from Slides and Booms is 28 7 per cent.

Slides and Booms.

Hydraulic and other Rents and Minor Public Works.

42. The revenue accrued from these sources was \$40,815. A sum in excess of this amount was, however, collected, viz.: \$58,126, some considerable progress having been made during the year in disposing of disputed arrears. There still remained, however, under the head of Hydraulic Rents at the close of the fiscal year, \$130,787 unpaid. Many of the parties from whom these arrears are due allege that they have claims against the Government, of the validity of which this Department is unable to judge. Some of them are, without doubt, fair subject for arbitration.

Hydraulic and other rents; reduction of arrears.

CULLING TIMBER.

Culling Timber. 43. The fees accrued under this head were \$49,560. The cost of culling has been in excess of such accrued revenue by between \$6,000 and \$7,000. It does not appear likely that with the reduced tariff now in force the revenue from this branch of the Service will meet the expenditure in any other years than those of exceptional activity.

WEIGHTS AND MEASURES.

Weights and Measures. 44. A special Report of this Service will, as heretofore, be submitted as Supplementary to this Report.

W & M., Gas and Law Stamps. 45. The revenue accrued on Weights and Measures, Gas and Law Stamps for the years 1881-82 and 1882-83 respectively, is:—

Increase of revenue.	Inspection of Weights and Measures.	Inspection of Gas.	Law Stamps.
	1881-82.....	\$26,853	\$2,549
			\$ 842
	1882-83.....	29,543	2,899
			2,128

The total revenue accrued in respect of these Stamps has aggregated during the year 1882-83, \$34,570.25 as against the revenue of the preceding year of \$30,243.77.

PREVENTION OF THE ADULTERATION OF FOOD.

Expenditure. 46. The amount expended under this Act for analysis of samples, retaining fees and rent during the past year was \$9,696.20 as per statement 11½.

Supplementary Report to follow. 47. A full report of the work performed and the reports of the analysts, will be found in supplementary report No. 3.

INSPECTION OF STAPLE ARTICLES.

Returns in relation to. 48. Appendices D, E, F., comprise returns in relation to the inspection of staple articles under the provisions of the Act of 1874.

Amendment of Act. 49. The proclamation of the Governor in Council necessary to put in force the Act of 17th May 1882, amending "The General Inspection Act, 1874", was passed on the 5th June 1883.

NOTE.—Coal to pass up all Canals, except the Welland Canal, free of Toll, as per Order in Council, June 7th, 1869.

Logs, Lumber or other produce shall pass free of Toll down the Chippawa Creek between the Aqueduct and Port Robinson, as per O. C., 18th May, 1863.

Iron Ore, Kryolite or Chemical Ore, through one section, or all the Canals, per ton, 5 cents.

All goods having paid full Toll through the whole line of the St. Lawrence Canals, or through the Lachine Canal, St. Ann's Lock, or Ottawa and Rideau Canals, shall be allowed to pass free through the Welland Canal; and if Tolls have been paid at the Chambly Canal, such Tolls shall be refunded at Montreal or Kingston Mills; and having paid full Tolls through the Welland Canal, they shall be allowed to pass free through the St. Lawrence Canals, or through the Ottawa and Rideau Canals, St. Ann's Lock, the Lachine Canal and the Chambly Canal; Provided always:—That the articles to be entitled to the above exemptions shall go downwards through the whole length of the Canal to Montreal, or pass upward from Montreal through the whole length of the St. Lawrence Canals, or the Ottawa and Rideau Canals, to Lake Ontario.

All articles, goods or merchandise not enumerated above, to be charged to Class No. 4.

No Let Passes to be issued to Steam Tugs or other small vessels for less than 25 cents as a minimum charge; but such vessels not carrying freight or passengers can obtain, on payment of \$30, a season "Let Pass," which will pass them up and down the Canal as often as desired.

Goods shipped to any port west of the St. Lawrence Canals, Tolls upon which have already been paid for passage through such Canals, may be re-shipped from such ports and be passed through the Welland Canal free of Tolls, in the same way as if they had been shipped through direct in the first instance; and goods going eastward, having paid Welland Canal Tolls, may be transhipped at any port on Lake Ontario, and thereafter pass free through the St. Lawrence Canals, as if they had been shipped through direct in the first instance.

NOTE.—Coal to pass up all Canals, except the Welland Canal, free of Toll, as per Order in Council, June 7th, 1869.

Logs, Lumber or other produce shall pass free of Toll down the Chippawa Creek between the Aqueduct and Port Robinson, as per O. C., 18th May, 1863.

Iron Ore, Kryolite or Chemical Ore, through one section, or all the Canals, per ton, 5 cents.

All goods having paid full Toll through the whole line of the St. Lawrence Canals, or through the Lachine Canal, St. Ann's Lock, or Ottawa and Rideau Canals, shall be allowed to pass free through the Welland Canal; and if Tolls have been paid at the Chambly Canal, such Tolls shall be refunded at Montreal or Kingston Mills; and having paid full Tolls through the Welland Canal, they shall be allowed to pass free through the St. Lawrence Canals, or through the Ottawa and Rideau Canals, St. Ann's Lock, the Lachine Canal and the Chambly Canal; Provided always:—That the articles to be entitled to the above exemptions shall go downwards through the whole length of the Canal to Montreal, or pass upward from Montreal through the whole length of the St. Lawrence Canals, or the Ottawa and Rideau Canals, to Lake Ontario.

All articles, goods or merchandise not enumerated above, to be charged to Class No. 4.

No Let Passes to be issued to Steam Tugs or other small vessels for less than 25 cents as a minimum charge; but such vessels not carrying freight or passengers can obtain, on payment of \$30, a season "Let Pass," which will pass them up and down the Canal as often as desired.

Goods shipped to any port west of the St. Lawrence Canals, Tolls upon which have already been paid for passage through such Canals, may be re-shipped from such ports and be passed through the Welland Canal free of Tolls, in the same way as if they had been shipped through direct in the first instance; and goods going eastward, having paid Welland Canal Tolls, may be transhipped at any port on Lake Ontario, and thereafter pass free through the St. Lawrence Canals, as if they had been shipped through direct in the first instance.
